

## M 5.6, 152 km S of Laojunmiao, China

Origin Time: 2022-01-23 02:21:19 UTC (Sun 08:21:19 local)

Location: 38.4843° N 97.3967° E Depth: 10.0 km

Created: 4 days, 22 hours after earthquake

### Estimated Fatalities

Yellow alert for economic losses. Some damage is possible and the impact should be relatively localized. Estimated economic losses are less than 1% of GDP of China. Past events with this alert level have required a local or regional level response.

Green alert for shaking-related fatalities. There is a low likelihood of casualties.

\*Estimated exposure only includes population within the map area.

### Population Exposure

### Structures

Overall, the population in this region resides in structures that are vulnerable to earthquake shaking, though resistant structures exist. The predominant vulnerable building types are adobe block and unreinforced brick with mud construction.
